

" Our commitment to total project management results in industry-leading design-to-market & product-development cycles. PCI designers, engineers, technicians, and quality assurance personnel, have the experience, the technology, and the support of the entire Polymer Conversion team in providing;

### **Product Design Support and Prototyping**

#### **Complete CAD/CAM Design & Modeling**

#### **Capability Analysis**

#### **Design of Experiments**

#### **Process and Product Validation"**

" PCI also provides the highest level of quality control by utilizing vision inspection, and measurement technology including;

#### **OGP Smartscope 10x6x8**

#### **Ziess Mechanical Measurement 27x27x22"**

" Whatever the application, PCI can design and engineer a turn-key solution that offers the client the fastest time-to-market, the highest quality product, the most reliable performance, and all at competitive prices."

### **Quality Assurance**

By choosing **Quality Assurance** the user is presented with the following video.

" Polymer Conversions, Inc., is dedicated to providing customers with the highest quality service from initial order to final delivery. We accomplish this by implementing a rigorous quality assurance program in every department at PCI."

" From our clean room manufacturing capabilities to our industry-leading vision inspection and measurement protocols, PCI offers both integrated quality systems and extensive regulatory and validation experience."

" Our lot tracking and traceability system follows each unit through every step of the production and validation process. This commitment to the validation process means that customers can rely on PCI to deliver consistent, reliable, highest quality products at competitive prices."

" This philosophy is best described by our corporate quality policy which states;

**We shall meet or exceed our customer's requirements, completely and without question, 100% of the time."**

### **Markets**

By choosing **Markets** the user is presented with the following video.

" Polymer Conversions provides high-quality, reliable, and cost-effective thermoplastic injection molded products for a wide variety of applications and markets. In over twenty years of doing business, we have developed, and continue to grow, a long list of loyal customers."

" Our innovative approach to design, production, testing & validation, and customer service, makes PCI a leader in providing products for;

**Healthcare**

**Electronics**

**Packaging**

**Business Machines**

**Industrial**

**Automotive"**

" At PCI we understand the unique requirements and exacting specifications in each of these markets, and we can quickly respond to continuing demands for more precise, reliable, smaller, and more cost-effective products."

" At PCI, we also provide specialized services to the healthcare industry, through the production of precision healthcare components and multi-component medical assembly.

" Some of our many products include;

**Blood Diagnostic Devices**

**Oxygen Generation Devices**

**External Feeding Pumps**

**IUDs**

**GI Diagnostic Devices**

**Needleless Injections**

**Drug Delivery Systems"**

" Our commitment to quality assurance and technological innovation means clients can expect to both improve clinical outcomes and reduce unit costs. "

" For the electronics industry, our attention to detail, our commitment to consistent quality, and our ability to verify adherence to customer specifications makes PCI products reliable and cost-effective."

" PCI provides such products as;

**Hospital Patient Communicator**

**Precision Gears"**

" In the packaging market we supply;

**Plastic Ampoules**
